Dante Wai Chun TSANG

CAREER HISTORY:

Dec 2016 – Sep 2017

HK Pickup Ltd.

Senior Tech Lead

HK Pickup Ltd (www.hkpickup.com) is an on-demand, door-to-door delivery platform, specialized in 4-hour same day delivery service in Hong Kong.

Responsibilities included:

- Designed system infrastructure using microservice architecture
- Developed the system using Golang, PostgreSQL, Kubernetes, React and React Native
- Developed machine learning algorithm to dispatch orders according to distance and time constraint

Nov 2011 – Feb 2014

Aftership Ltd.

Chief Technology Officer & Co-founder

AfterShip provides an automated way for online merchants to track packages and send their customers delivery status notifications. Customers no longer need to deal with tracking numbers and track packages on their own. With AfterShip, online merchants extend their customer service after the point of purchase by keeping their customers actively informed, while saving time and money by reducing customers' questions about the status of their purchase delivery. AfterShip offers free service for merchants to track up to 500 packages each month, and supports over 40 couriers worldwide. AfterShip is the winner of the 2011 Global Startup Battle. For more information, visit www.aftership.com.

Awards:

- Funded by IDG-Accel China Growth Fund in 2014 (USD\$1,000,000)
- Funded by Hong Kong Cyberport Incubation Programme in 2011 (HK\$53,000)
- Funded by Hong Kong Cyberport Creative Micro Fund in 2011 (HK\$100,000)
- Funded by Business Switch Pty LTD (US\$50,000)
- Funded by Hong Kong PolyU Micro Fund in 2011 (HK\$100,000)
- Winner of Startup Weekend Hong Kong in 2011
- Winner of Global Startup Battle in 2011

Responsibilities included:

- Designed system infrastructure and architecture based on open source framework and softwares (Rails, MongoDB) to allow real time data mining of tracking information
- Developed the system using Ruby, HTML5 and JavaScript
